

MADEINSEA

Innovation through Sustainability

FARO 5-6 DEZEMBRO 2018

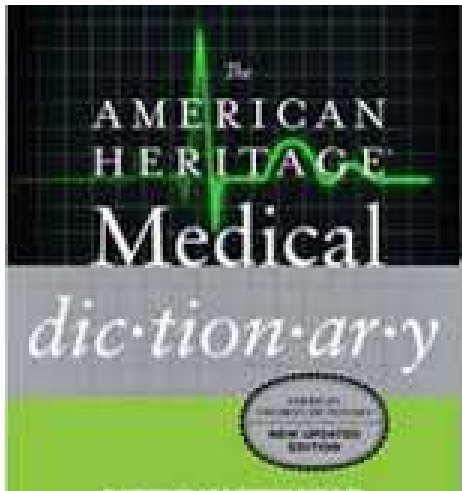

Ulvano

Polissacárido extraído de algas

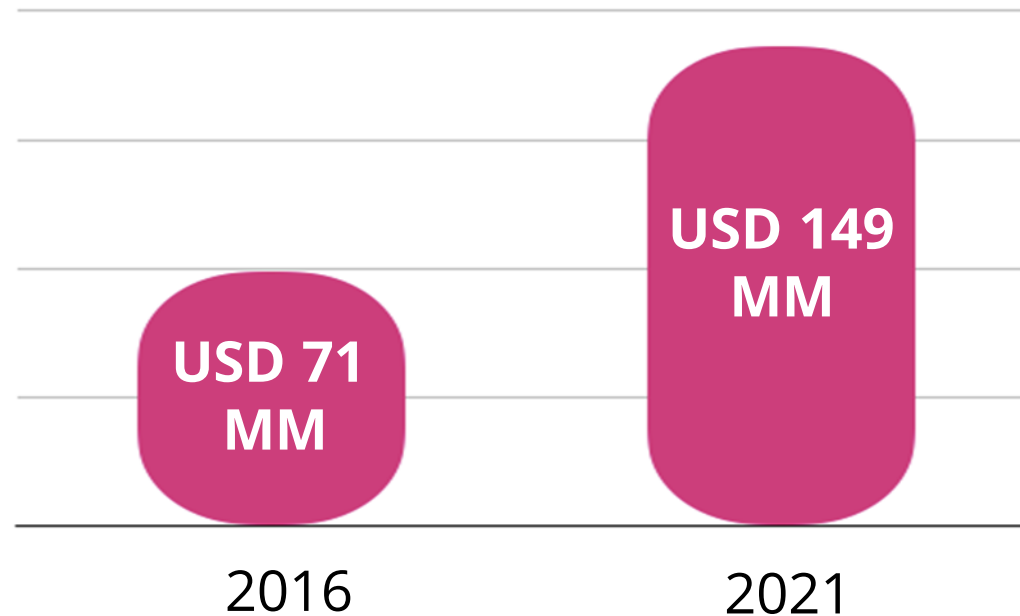

Principal Mercado - Biomateriais

Biomaterial (bi-o-ma-te-ri-al) *n.*

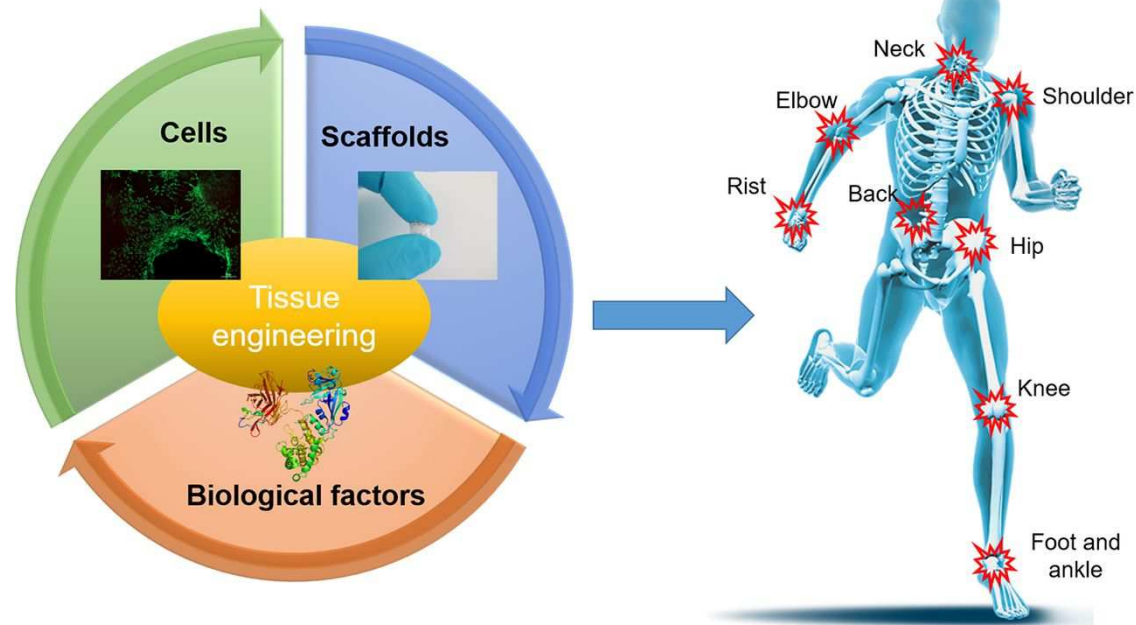

Material biocompatível usado para substituir tecidos humanos naturais, construir órgãos artificiais e próteses.

Biomateriais – mercado global

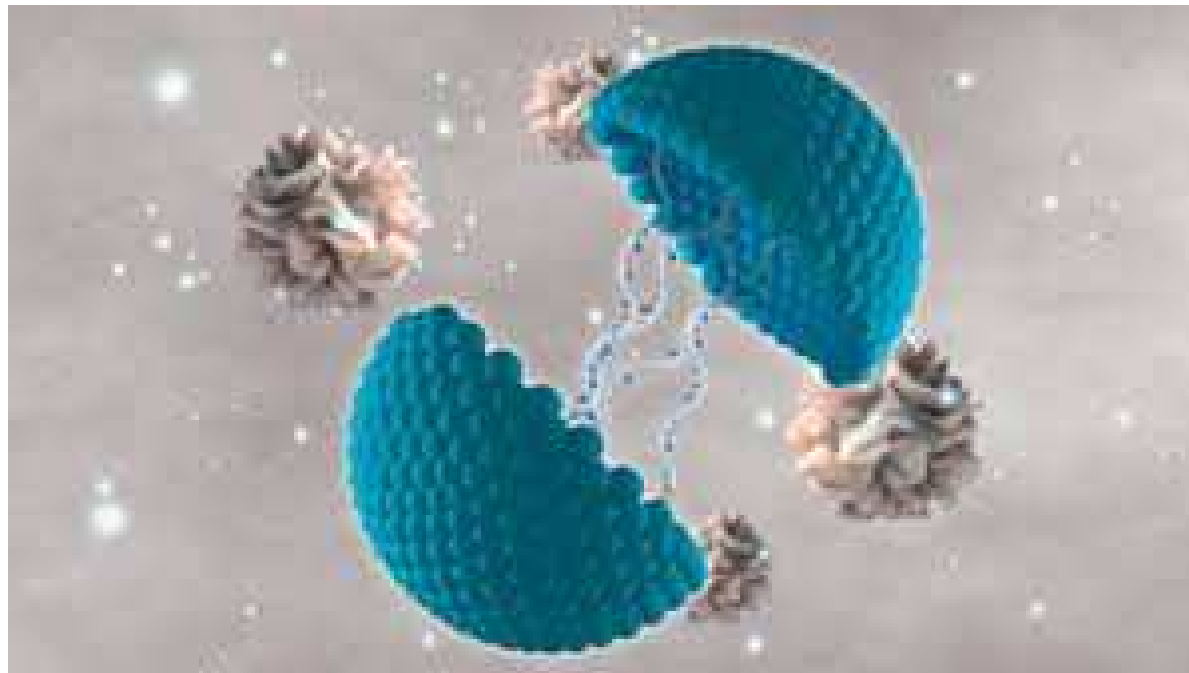

Fonte: Business Wire – Berkshire Hathaway

Engenharia de tecidos

Nanomedicina – sistemas entrega medicamentos

Pensos e ligaduras funcionais

Outros segmentos – Farma e nutracêutica

anticoagulante

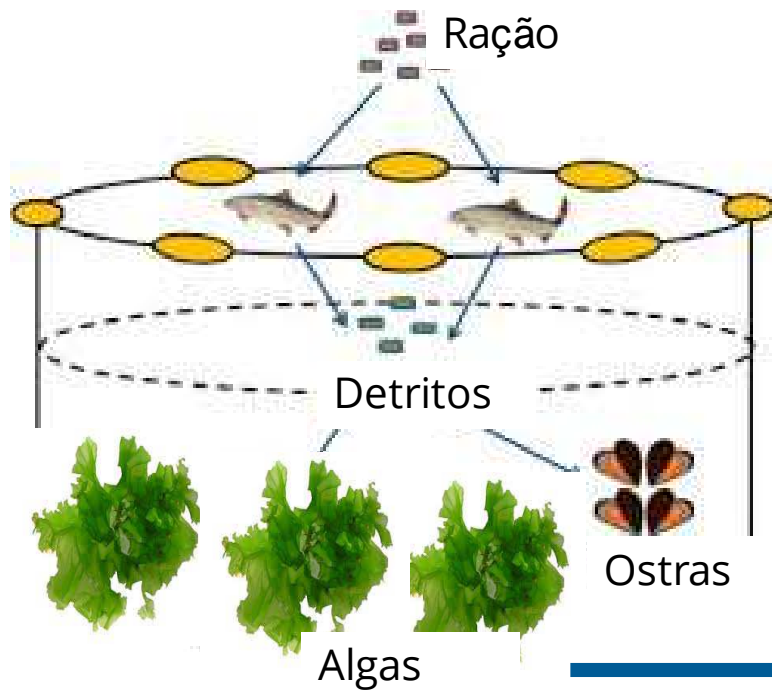

antitumoral

antiviral

Modelo de produção circular

Ulvano

Aquacultura multitrófica integrada

Modelo de produção circular

Estação Piloto de Piscicultura em Olhão (EPPO)

Integrate Aquaculture:
an eco-innovative solution to foster
sustainability in the Atlantic Area

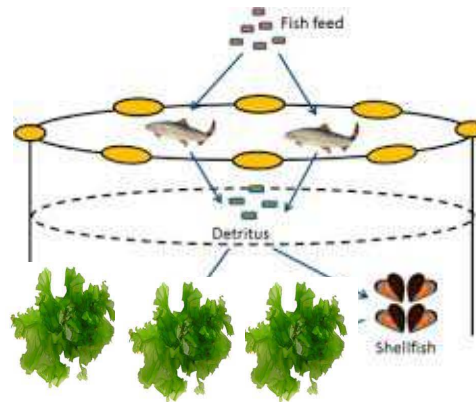

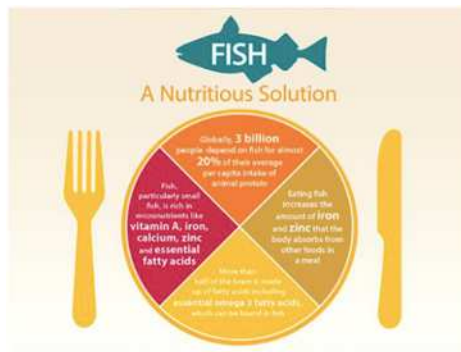

INTERREG Atlantic Area 2014-2020 Project

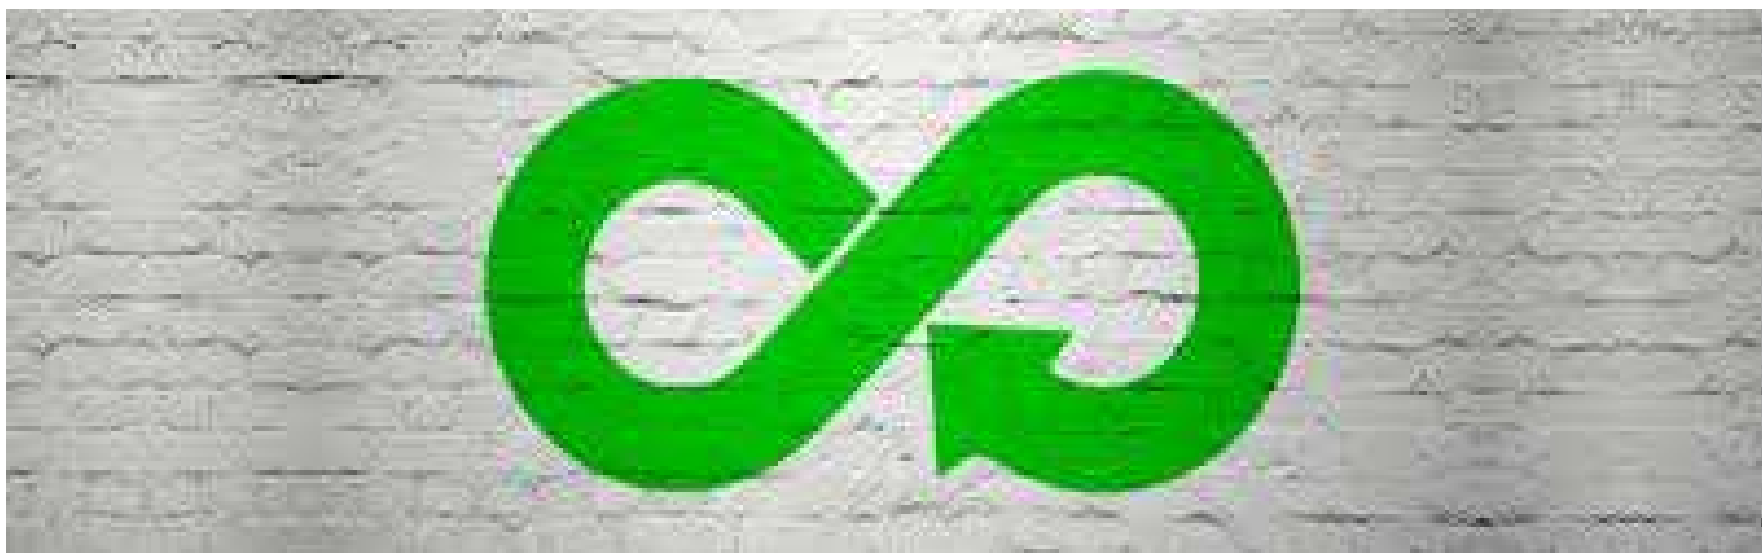

Modelo circular de produção

Múltiplos benefícios

Um novo paradigma

Equipa de Gestão

Miguel Silveira

Biólogo marinho, MSc., candidato a PhD C. Biomédicas
12+ experiência de gestão

Mário Ferreira

IT and MBA Corporate Finance
20+ experiência gestão

Pedro Ferreira

Marketing e MBA
20+ experiência gestão

Coordenação científica

Anabela Alves

PhD Eng. Biomédica

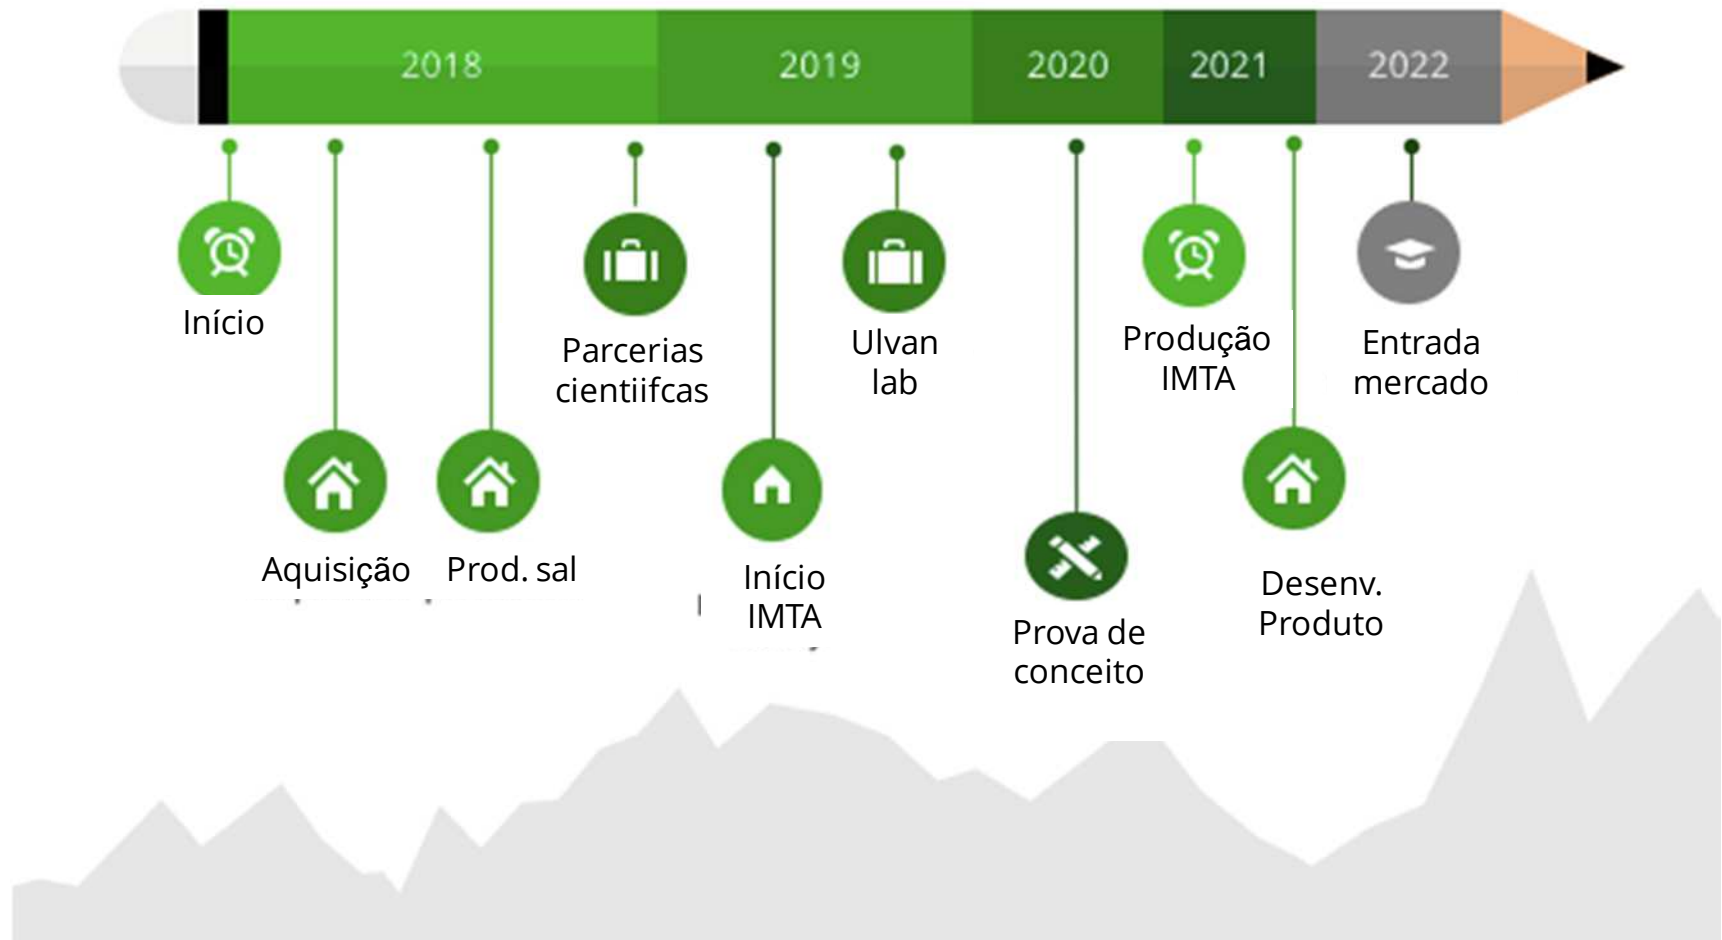

7+ anos investigação
ulvano em biomedicina

Universidade do Minho
Escola de Engenharia

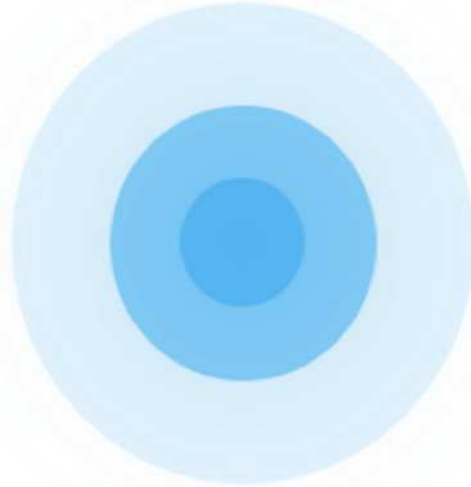

Principais etapas

Um agradecimento especial
